

Introduction

A number of Platform-as-a-Service ([PaaS](#)) providers allow you to use Go applications on their clouds.

Details

PaaS	Repository	Quickstart Guide
Google App Engine	https://github.com/GoogleCloudPlatform/appengine-plus-go	https://developers.google.com/appengine/
Azure	https://github.com/wadewegner/azure-website-go-builder	http://www.wadewegner.com/2015/01/cloud-foundry-extension-and-resource-template-for-azure/
IBM BlueMix		http://www.ibm.com/developerworks/cloud/library/a/1409.ibm.com.ibmcloud.ibmcloud-go-app/
CloudBees	https://github.com/CloudBees-community/golang-clickstart	
Cloud Foundry	https://github.com/kr/heroku-buildpack-go	http://catdevrandom.me/blog/2013/05/14/cloud-foundry-v2/
dotCloud	https://github.com/kencochrane/golang-on-dotcloud	
AWS Elastic Beanstalk	https://github.com/sqs/go-elasticbeanstalk	
Heroku	https://github.com/kr/heroku-buildpack-go	http://mmcgrana.github.com/2012/09/09/running-go-on-heroku.html
OpenShift	https://github.com/gcmurphy/golang-openshift	
Stackato	https://github.com/kr/heroku-buildpack-go	http://docs.stackato.com/user/deploy/languages/go/
Tsuru		http://docs.tsuru.io/en/latest/apps/quickstart/
Cocaine	http://github.com/cocaine https://github.com/3Hren/cocaine-core https://github.com/3Hren/cocaine-plugins https://github.com/cocaine/cocaine-framework-go	https://github.com/cocaine/cocaine-vagrant https://github.com/3Hren/cocaine-core
