

Static export example

This example show how to export to static HTML files your Next.js application fetching data from an API to generate a dynamic list of pages.

When trying to run `npm start` it will build and export your pages into the `out` folder and serve them on `localhost:5000`.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-static-export with-static-export-app
# or
yarn create next-app --example with-static-export with-static-export-app
# or
pnpm create next-app -- --example with-static-export with-static-export-app
```
