

Aliases cheatsheet

Maintainer: @hqingyi

With lots of 3rd-party amazing aliases installed, this plugin helps list the shortcuts that are currently available based on the plugins you have enabled.

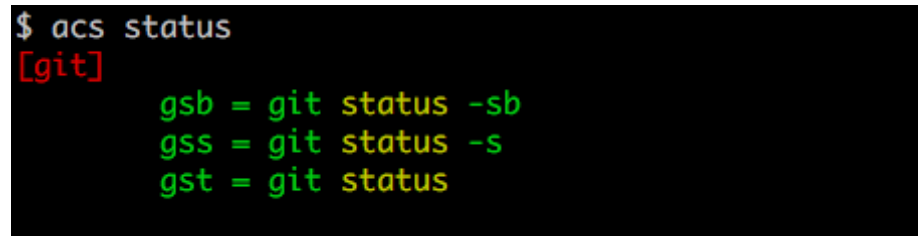

To use it, add **aliases** to the plugins array in your zshrc file:

```
plugins=(aliases)
```

Requirements: Python needs to be installed.

Usage

- **acs**: show all aliases by group.
- **acs <keyword>**: filter aliases by <keyword> and highlight.

```
$ acs status
[git]
    gsb = git status -sb
    gss = git status -s
    gst = git status
```
