

Digital TV Deprecated APIs

The APIs described here **should not** be used on new drivers or applications.

The DVBv3 frontend API has issues with new delivery systems, including DVB-S2, DVB-T2, ISDB, etc.

Attention!

The APIs described here doesn't necessarily reflect the current code implementation, as this section of the document was written for DVB version 1, while the code reflects DVB version 3 implementation.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\dvb\[linux-master] [Documentation] [userspace-api] [media] [dvb] legacy_dvb_apis.rst, line 22)
