

## zh-CN

一种常见的卡片内容区隔模式。

## en-US

Grid style card content.

```
import { Card } from 'antd';

const gridStyle = {
  width: '25%',
  textAlign: 'center',
};

export default () => (
  <Card title="Card Title">
    <Card.Grid style={gridStyle}>Content</Card.Grid>
    <Card.Grid hoverable={false} style={gridStyle}>
      Content
    </Card.Grid>
    <Card.Grid style={gridStyle}>Content</Card.Grid>
    <Card.Grid style={gridStyle}>Content</Card.Grid>
    <Card.Grid style={gridStyle}>Content</Card.Grid>
    <Card.Grid style={gridStyle}>Content</Card.Grid>
    <Card.Grid style={gridStyle}>Content</Card.Grid>
  </Card>
);
```
