

sbt plugin

This plugin adds completion for the [sbt, the interactive build tool](#), as well as some aliases for common sbt commands.

To use it, add `sbt` to the plugins array in your `zshrc` file:

```
plugins=(... sbt)
```

Aliases

Alias	Command	Description
sbc	sbt compile	Compiles the main sources
sbcln	sbt clean	Deletes all generated files
sbcc	sbt clean compile	Deletes generated files, compiles the main sources
