

## Examples of Good Issue Titles

- No error issued when supertype is used in place of subtype
- Incorrect error issued when using class where expression is expected
- Poor error message when comparing string literal types
- Incorrect type inferred to initialized class property
- Incorrect formatting with array of object literals
- Missing member in completion list on ‘this’ in interface when base type is intersection type
- Suggestion: Don’t issue errors when modules aren’t resolved
- Property of union type not narrowed in ‘else’ block
- Inferred type of default export is missing index signature
- Crash when accessing property declared in JSDoc
- Comments missing in emit for switch block

## Examples of Unacceptable Issue Titles

- Can’t use jquery with angular
- Unexpected type message
- Compiler throws wrong error
