DescriptionItem

Property	Description	Type	Default	Version
contentStyle	Customize content style	CSSProperties	-	4.9.0
label	The description of the content	ReactNode	-	
labelStyle	Customize label style	CSSProperties	-	4.9.0
span	The number of columns included	number	1	

The number of span Description.Item. Span={2} takes up the width of two DescriptionItems. When both `style` and `labelStyle`(or `contentStyle`) configured, both of them will work. And next one will overwrite first when conflict.
