

Ethernet Bridging

In order to use the Ethernet bridging functionality, you'll need the userspace tools.

Documentation for Linux bridging is on:

<http://www.linuxfoundation.org/collaborate/workgroups/networking/bridge>

The bridge-utilities are maintained at:

[git://git.kernel.org/pub/scm/linux/kernel/git/shemminger/bridge-utils.git](https://git.kernel.org/pub/scm/linux/kernel/git/shemminger/bridge-utils.git)

Additionally, the iproute2 utilities can be used to configure bridge devices.

If you still have questions, don't hesitate to post to the mailing list (more info <https://lists.linux-foundation.org/mailman/listinfo/bridge>).
