

# Create React App example

## How to use

Download the example [or clone the repo](#):

```
curl https://codeload.github.com/mui/material-ui/tar.gz/master | tar -xz --strip=2
material-ui-master/examples/create-react-app
cd create-react-app
```

Install it and run:

```
npm install
npm start
```

or:

Edit on CodeSandbox

Open in StackBlitz

## The idea behind the example

This example demonstrates how you can use [Create React App](#). It includes `@mui/material` and its peer dependencies, including `emotion`, the default style engine in MUI v5. If you prefer, you can [use styled-components instead](#).

## What's next?

You now have a working example project. You can head back to the documentation, continuing browsing it from the [templates](#) section.
