Mouse.dragAndDrop() method

Performs a drag, dragenter, dragover, and drop in sequence.

Signature:

```
dragAndDrop(start: Point, target: Point, options?: {  
    delay?: number;  
}): Promise<void>;
```

Parameters

Parameter	Type	Description
start	Point	
target	Point	point to drag from
options	{ delay?: number; }	An object of options. Accepts delay which, if specified, is the time to wait between dragover and drop in milliseconds. Defaults to 0.

Returns:

Promise<void>
