

# rbfu plugin

This plugin starts [rbfu](#), a minimal Ruby version manager, and adds some useful functions.

To use it, add `rbfu` to the plugins array in your zshrc file:

```
plugins=(... rbfu)
```

**Note:** `rbfu` is deprecated and should no longer be used.

## Functions

- `rbfu-rubies` : lists all installed rubies available to rbfu.
- `rvm_prompt_info` : shows the Ruby version being used with rbfu.
