

## zh-CN

通过设置 `Steps.Step` 的 `icon` 属性，可以启用自定义图标。

## en-US

You can use your own custom icons by setting the property `icon` for `Steps.Step`.

```
import { Steps } from 'antd';
import { UserOutlined, SolutionOutlined, LoadingOutlined, SmileOutlined } from
 '@ant-design/icons';

const { Step } = Steps;

export default () => (
  <Steps>
    <Step status="finish" title="Login" icon={<UserOutlined />} />
    <Step status="finish" title="Verification" icon={<SolutionOutlined />} />
    <Step status="process" title="Pay" icon={<LoadingOutlined />} />
    <Step status="wait" title="Done" icon={<SmileOutlined />} />
  </Steps>
);
```
