

Divider

The dividing line that separates the content.

Basic usage

Divide the text of different paragraphs.

```
<template>
  <div>
    <span>I sit at my window this morning where the world like a passer-by stops for a moment
    </el-divider></el-divider>
    <span>There little thoughts are the rustle of leaves; they have their whisper of joy in
  </div>
</template>
```

Custom content

You can customize the content on the divider line.

```
<template>
  <div>
    <span>What you are you do not see, what you see is your shadow. </span>
    <el-divider content-position="left">Rabindranath Tagore</el-divider>
    <span>I cannot choose the best. The best chooses me.</span>
    <el-divider><i class="el-icon-star-on"></i></el-divider>
    <span>My wishes are fools, they shout across thy song, my Master. Let me but listen.</span>
    <el-divider content-position="right">Rabindranath Tagore</el-divider>
  </div>
</template>
```

Vertical divider

```
<template>
  <div>
    <span>Rain</span>
    <el-divider direction="vertical"></el-divider>
    <span>Home</span>
    <el-divider direction="vertical"></el-divider>
    <span>Grass</span>
  </div>
</template>
```
