

Hello World function example

This example shows off the simplest possible Function.

1. Start developing.

To get started clone this repo locally and run `npm install` to add all necessary packages.

```
cd examples/functions-hello-world
npm install
npm run develop
```

2. Open the code and start customizing!

Your site is now running at `http://localhost:8000!` You can use the UI on the index page to test the functions or directly access them at `http://localhost:8000/api/hello-world`

Try editing the text in `src/api/hello-world.js` to e.g. `Hello Gatsby Functions` and then re-running `curl`.

3. Deploy

You can deploy this example on Gatsby Cloud by copying the example into a new repo and connecting that to Gatsby Cloud.
