

List below is way deprecated. In order to manage to display FA V.4 in an HTML Select, you have to use

<http://silviomoreto.github.io/bootstrap-select/>

[FontAwesome Icon Picker](#)

This plugin allows you to use data-content attribute to display the icons. Example:

```
$x = array( 'fa-arrows-v' => array('data-content' => "<i class='fa fa-arrows-v'></i>", 'value' => 'fa-arrows-v', 'name' => 'fa-arrows-v'), 'fa-beer' => array('data-content' => "<i class='fa fa-beer'></i>", 'value' => 'fa-beer', 'name' => 'fa-beer'), );
```

Populate your select with this array's format.

```
<select class="btn btn-sieltec-primary">
  <optgroup label="Web Application Icons">
    <option value="icon-adjust">icon-adjust</option>
