

zh-CN

`beforeUpload` 返回 `false` 后, 手动上传文件。

en-US

Upload files manually after `beforeUpload` returns `false`.

```
import { Upload, Button, message } from 'antd';
import { UploadOutlined } from '@ant-design/icons';

class Demo extends React.Component {
  state = {
    fileList: [],
    uploading: false,
  };

  handleUpload = () => {
    const { fileList } = this.state;
    const formData = new FormData();
    fileList.forEach(file => {
      formData.append('files[]', file);
    });
    this.setState({
      uploading: true,
    });
    // You can use any AJAX library you like
    fetch('https://www.mocky.io/v2/5cc8019d300000980a055e76', {
      method: 'POST',
      body: formData,
    })
      .then(res => res.json())
      .then(() => {
        this.setState({
          fileList: [],
        });
        message.success('upload successfully.');
```

```

onRemove: file => {
  this.setState(state => {
    const index = state.fileList.indexOf(file);
    const newFileList = state.fileList.slice();
    newFileList.splice(index, 1);
    return {
      fileList: newFileList,
    };
  });
},
beforeUpload: file => {
  this.setState(state => ({
    fileList: [...state.fileList, file],
  }));
  return false;
},
fileList,
};

return (
  <>
    <Upload {...props}>
      <Button icon={<UploadOutlined />}>Select File</Button>
    </Upload>
    <Button
      type="primary"
      onClick={this.handleUpload}
      disabled={fileList.length === 0}
      loading={uploading}
      style={{ marginTop: 16 }}
    >
      {uploading ? 'Uploading' : 'Start Upload'}
    </Button>
  </>
);
}
}

export default () => <Demo />;

```
