
Before filing an issue we'd appreciate it if you could take a moment to ensure there isn't already an open issue or pull-request.

If there's an existing issue, please add a `:+1:` reaction to the description of the issue. One way we prioritize issues is by the number of `:+1:` reactions on their descriptions. Please DO NOT add `+1` or `:+1:` comments.

Feature requests and proposals

We're excited to hear how we can make Svelte better. Please add as much detail as you can on your use case. To propose an implementation of a large feature or change, please create an RFC.

Bugs

If you're filing an issue about a bug please include as much information as you can including the following.

- Your browser and the version: (e.x. Chrome 52.1, Firefox 48.0, IE 10)
- Your operating system: (e.x. OS X 10, Windows XP, etc)
- Svelte version (Please check you can reproduce the issue with the latest release!)
- Whether your project uses Webpack or Rollup
- *Repeatable steps to reproduce the issue*

Thanks for being part of Svelte!
