Browser.createIncognitoBrowserContext() method

Creates a new incognito browser context. This won't share cookies/cache with other browser contexts.

Signature:

```
createIncognitoBrowserContext(): Promise<BrowserContext>;
```

Returns:

Promise<[BrowserContext](#)>

Example

```
(async () => {  
  const browser = await puppeteer.launch();  
  // Create a new incognito browser context.  
  const context = await browser.createIncognitoBrowserContext();  
  // Create a new page in a pristine context.  
  const page = await context.newPage();  
  // Do stuff  
  await page.goto('https://example.com');  
})();
```
