表单有三种布局。

en-US

There are three layout for form: `horizontal`, `vertical`, `inline`.

```
import React, { useState } from 'react';
import { Form, Input, Button, Radio } from 'antd';

type LayoutType = Parameters<typeof Form>[0]['layout'];

const FormLayoutDemo = () => {
  const [form] = Form.useForm();
  const [formLayout, setFormLayout] = useState<LayoutType>('horizontal');

  const onFormLayoutChange = ({ layout }: { layout: LayoutType }) => {
    setFormLayout(layout);
  };

  const formItemLayout =
    formLayout === 'horizontal'
      ? {
          labelCol: { span: 4 },
          wrapperCol: { span: 14 },
        }
      : null;

  const buttonItemLayout =
    formLayout === 'horizontal'
      ? {
          wrapperCol: { span: 14, offset: 4 },
        }
      : null;

  return (
    <Form
      {...formItemLayout}
      layout={formLayout}
      form={form}
      initialValues={{ layout: formLayout }}
      onValuesChange={onFormLayoutChange}
    >
      <Form.Item label="Form Layout" name="layout">
        <Radio.Group value={formLayout}>
          <Radio.Button value="horizontal">Horizontal</Radio.Button>
          <Radio.Button value="vertical">Vertical</Radio.Button>
          <Radio.Button value="inline">Inline</Radio.Button>
        </Radio.Group>
      </Form.Item>
    </Form>
  );
};
```

```
<Form.Item label="Field A">
  <Input placeholder="input placeholder" />
</Form.Item>
<Form.Item label="Field B">
  <Input placeholder="input placeholder" />
</Form.Item>
<Form.Item {...buttonItemLayout}>
  <Button type="primary">Submit</Button>
</Form.Item>
</Form>
);
};

export default () => <FormLayoutDemo />;
```
