Browser.version() method

A string representing the browser name and version.

Signature:

```
version(): Promise<string>;
```

Returns:

Promise<string>

Remarks

For headless Chromium, this is similar to `HeadlessChrome/61.0.3153.0` . For non-headless, this is similar to `Chrome/61.0.3153.0` .

The format of browser.version() might change with future releases of Chromium.
