

Home > puppeteer > Frame > \$

Frame.\$() method

This method queries the frame for the given selector.

Signature:

```
$<T extends Element = Element>(selector: string): Promise<ElementHandle<T> | null>;
```

Parameters

Parameter	Type	Description
selector	string	a selector to query for.

Returns:

Promise<ElementHandle<T> | null>

A promise which resolves to an **ElementHandle** pointing at the element, or **null** if it was not found.
