Standard Minifier for JS

This package provides a minifier plugin used for Meteor apps by default.

The behavior of this plugin in development and production modes are depicted below in the table.

	DEV	PROD
Minified	N	Y
Concatenated	N	Y
Source Maps	Y	N

The options that are set that differ from the default settings used by terser are the following:

```
drop_debugger: false
unused:        false
safari10:      true
```
