The main development site and GIT repository for Digital TV drivers is <https://linuxtv.org>.

The DVB mailing list linux-dvb is hosted at vger. Please see <http://vger.kernel.org/vger-lists.html#linux-media> for details.

There are also some other old lists hosted at: <https://linuxtv.org/lists.php>. If you're interested on that for historic reasons, please check the archive at <https://linuxtv.org/pipermail/linux-dvb/>.

The media subsystem Wiki is hosted at <https://linuxtv.org/wiki/>. There, you'll find lots of information, from both development and usage of media boards. Please check it before asking newbie questions on the mailing list or IRC channels.

The API documentation is documented at the Kernel tree. You can find it in both html and pdf formats, together with other useful documentation at:

- <https://linuxtv.org/docs.php>.

You may also find useful material at <https://linuxtv.org/downloads/>.

In order to get the needed firmware for some drivers to work, there's a script at the kernel tree, at `scripts/get_dvb_firmware`.
