

## One Dark Syntax theme

A screenshot of a code editor with a dark background, showcasing the One Dark Syntax theme. The code is written in a light-colored font, with line numbers 1 through 15 on the left. The code includes Sass-style imports, a comment, and CSS class definitions for a project and a header. The text is color-coded: keywords like @import and color are in purple, strings are in green, comments are in grey, and CSS property names and values are in orange or red. The line containing 'background: @base-background-color;' is highlighted with a light blue background.

```
1  @import "vars";
2  @import "mixins";
3  @import "components";
4
5  // My Project
6
7  .my-project {
8    color: @text-color;
9    background: @base-background-color;
10
11    &-header {
12      font-size: 1.1em;
13      border-bottom: 1px solid;
14    }
15
```
