```

Name

VIDIOC_G_INPUT - VIDIOC_S_INPUT - Query or select the current video input

Synopsis

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v4l\[linux-master] [Documentation] [userspace-api] [media] [v4l]vidioc-g-input.rst, line 18)

Unknown directive type "c:macro".

```
.. c:macro:: VIDIOC_G_INPUT
```

```
int ioctl(int fd, VIDIOC_G_INPUT, int *argp)
```

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v4l\[linux-master] [Documentation] [userspace-api] [media] [v4l]vidioc-g-input.rst, line 22)

Unknown directive type "c:macro".

```
.. c:macro:: VIDIOC_S_INPUT
```

```
int ioctl(int fd, VIDIOC_S_INPUT, int *argp)
```

Arguments

fd

File descriptor returned by `c:func:open()`.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v4l\[linux-master] [Documentation] [userspace-api] [media] [v4l]vidioc-g-input.rst, line 30); [backlink](#)

Unknown interpreted text role "c:func".

argp

Pointer an integer with input index.

Description

To query the current video input applications call the `ref:VIDIOC_G_INPUT<VIDIOC_G_INPUT>` ioctl with a pointer to an integer where the driver stores the number of the input, as in the struct `c:type:v4l2_input` index field. This ioctl will fail only when there are no video inputs, returning `EINVAL`.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v4l\[linux-master] [Documentation] [userspace-api] [media] [v4l]vidioc-g-input.rst, line 38); [backlink](#)

Unknown interpreted text role "ref".

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v4l\[linux-master] [Documentation] [userspace-api] [media] [v4l]vidioc-g-input.rst, line 38); [backlink](#)

Unknown interpreted text role "c:type".

To select a video input applications store the number of the desired input in an integer and call the `ref`VIDIOC_S_INPUT`` `<VIDIOC_G_INPUT>` ioctl with a pointer to this integer. Side effects are possible. For example inputs may support different video standards, so the driver may implicitly switch the current standard. Because of these possible side effects applications must select an input before querying or negotiating any other parameters.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v4l\[linux-master] [Documentation] [userspace-api] [media] [v4l]vidioc-g-input.rst, line 44); [backlink](#)

Unknown interpreted text role "ref".

Information about video inputs is available using the `ref`VIDIOC_ENUMINPUT`` ioctl.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v4l\[linux-master] [Documentation] [userspace-api] [media] [v4l]vidioc-g-input.rst, line 52); [backlink](#)

Unknown interpreted text role "ref".

Return Value

On success 0 is returned, on error -1 and the `errno` variable is set appropriately. The generic error codes are described at the `ref`Generic Error Codes <gen-errors>`` chapter.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v4l\[linux-master] [Documentation] [userspace-api] [media] [v4l]vidioc-g-input.rst, line 58); [backlink](#)

Unknown interpreted text role "ref".

EINVAL

The number of the video input is out of bounds.
