

zh-CN

和 [数字输入框](#) 组件保持同步。

en-US

Synchronize with [InputNumber](#) component.

```
import { Slider, InputNumber, Row, Col } from 'antd';

class IntegerStep extends React.Component {
  state = {
    inputValue: 1,
  };

  onChange = value => {
    this.setState({
      inputValue: value,
    });
  };

  render() {
    const { inputValue } = this.state;
    return (
      <Row>
        <Col span={12}>
          <Slider
            min={1}
            max={20}
            onChange={this.onChange}
            value={typeof inputValue === 'number' ? inputValue : 0}
          />
        </Col>
        <Col span={4}>
          <InputNumber
            min={1}
            max={20}
            style={{ margin: '0 16px' }}
            value={inputValue}
            onChange={this.onChange}
          />
        </Col>
      </Row>
    );
  }
}

class DecimalStep extends React.Component {
  state = {
    inputValue: 0,
  };
}
```

```

onChange = value => {
  if (isNaN(value)) {
    return;
  }
  this.setState({
    inputValue: value,
  });
};

render() {
  const { inputValue } = this.state;
  return (
    <Row>
      <Col span={12}>
        <Slider
          min={0}
          max={1}
          onChange={this.onChange}
          value={typeof inputValue === 'number' ? inputValue : 0}
          step={0.01}
        />
      </Col>
