

# Notes to run sig-windows tests

## 1. Prereqs:

```
KUBECONFIG=path/to/kubeconfig  
curl https://raw.githubusercontent.com/kubernetes-sigs/windows-testing/master/images/image-repo-list -o repo_list  
export KUBE_TEST_REPO_LIST=$(pwd)/repo_list
```

## 1. Run only sig-windows tests:

```
./e2e.test --provider=local --ginkgo.noColor --ginkgo.focus="\[sig-windows\]|\[Feature:Windows\]" --node-os-distro="windows"
```

# e2e\_node/density\_test diff

This test is borrowed from the density test in e2e\_node/density\_test. All but the first test were omitted as well as some logging.
