

zh-CN

在浮层中加入额外的页脚，以满足某些定制信息的需求。

en-US

Render extra footer in panel for customized requirements.

```
import { DatePicker, Space } from 'antd';

const { RangePicker } = DatePicker;

export default () => (
  <Space direction="vertical" size={12}>
    <DatePicker renderExtraFooter={() => 'extra footer'} />
    <DatePicker renderExtraFooter={() => 'extra footer'} showTime />
    <RangePicker renderExtraFooter={() => 'extra footer'} />
    <RangePicker renderExtraFooter={() => 'extra footer'} showTime />
    <DatePicker renderExtraFooter={() => 'extra footer'} picker="month" />
  </Space>
);
```
