

## tig plugin

This plugin adds some aliases for people who work with [tig](#) (text-mode interface for Git) in a regular basis. To use it, add `tig` to your plugins array:

```
plugins=(... tig)
```

### Features

Alias	Command	Description
tis	tig status	Show git status
til	tig log	Show git log
tib	tig blame -C	git-blame a file detecting copies and renames
