

## zh-CN

联动 checkbox。

## en-US

Communicated with other components.

```
import { Checkbox, Button } from 'antd';

class App extends React.Component {
  state = {
    checked: true,
    disabled: false,
  };

  toggleChecked = () => {
    this.setState({ checked: !this.state.checked });
  };

  toggleDisable = () => {
    this.setState({ disabled: !this.state.disabled });
  };

  onChange = e => {
    console.log('checked = ', e.target.checked);
    this.setState({
      checked: e.target.checked,
    });
  };

  render() {
    const label = `${this.state.checked ? 'Checked' : 'Unchecked'}-${
      this.state.disabled ? 'Disabled' : 'Enabled'
    }`;
    return (
      <>
        <p style={{ marginBottom: '20px' }}>
          <Checkbox
            checked={this.state.checked}
            disabled={this.state.disabled}
            onChange={this.onChange}
          >
            {label}
          </Checkbox>
        </p>
        <p>
          <Button type="primary" size="small" onClick={this.toggleChecked}>
            {!this.state.checked ? 'Check' : 'Uncheck'}
          </Button>
          <Button
```

```
        style={{ margin: '0 10px' }}
        type="primary"
        size="small"
        onClick={this.toggleDisable}
      >
        {!this.state.disabled ? 'Disable' : 'Enable'}
      </Button>
    </p>
  </>
);
}
}

export default () => <App />;
```
