

Installation

npm

Installing with npm is recommended and it works seamlessly with webpack.

```
npm i element-ui -S
```

CDN

Get the latest version from unpkg.com/element-ui , and import JavaScript and CSS file in your page.

```
<!-- import CSS -->
<link rel="stylesheet" href="https://unpkg.com/element-ui/lib/theme-chalk/index.css">
<!-- import JavaScript -->
<script src="https://unpkg.com/element-ui/lib/index.js"></script>
```

We recommend our users to lock Element's version when using CDN. Please refer to unpkg.com for more information.

Hello world

If you are using CDN, a hello-world page is easy with Element. [Online Demo](#)

See the [Pen Element demo](#) by [hetch \(@ziyoung\)](#) on CodePen.

If you are using npm and wish to apply webpack, please continue to the next page: [Quick Start](#).
