

Example app with Plausible

This example shows how to use [Next.js](#) along with [Plausible](#) via the [next-plausible](#) package. A custom [_app.js](#) is used to wrap our app with the [PlausibleProvider](#) to track page views and [custom events](#) are shown as well.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute [create-next-app](#) with [npm](#) or [Yarn](#) to bootstrap the example::

```
npx create-next-app --example with-plausible with-plausible-app
# or
yarn create next-app --example with-plausible with-plausible-app
# or
pnpm create next-app -- --example with-plausible with-plausible-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
