

PuppeteerNode.executablePath() method

Signature:

```
executablePath(channel?: string): string;
```

Parameters

Parameter	Type	Description
channel	string	

Returns:

string

A path where Puppeteer expects to find the bundled browser. The browser binary might not be there if the download was skipped with the `PUPPETEER_SKIP_DOWNLOAD` environment variable.

Remarks

****NOTE**** `puppeteer.executablePath()` is affected by the `PUPPETEER_EXECUTABLE_PATH` and `PUPPETEER_CHROMIUM_REVISION` environment variables.
