

Home > puppeteer > BrowserContext > overridePermissions

BrowserContext.overridePermissions() method

Signature:

```
overridePermissions(origin: string, permissions: Permission[]): Promise<void>;
```

Parameters

Parameter	Type	Description
origin	string	The origin to grant permissions to, e.g. "https://example.com".
permissions	Permission[]	An array of permissions to grant. All permissions that are not listed here will be automatically denied.

Returns:

Promise<void>

Example

```
const context = browser.defaultBrowserContext();  
await context.overridePermissions('https://html5demos.com', ['geolocation']);
```
