

## Icon

Element provides a set of common icons.

### Basic usage

Just assign the class name to `el-icon-iconName` .

:::demo

```
<i class="el-icon-edit"></i>
<i class="el-icon-share"></i>
<i class="el-icon-delete"></i>
<el-button type="primary" icon="el-icon-search">Search</el-button>
```

...

### Icons

- `{{'el-icon-' + name}}`
