

# Bitwarden (unofficial) CLI plugin

This plugin adds completion for [rbw](#), an unofficial CLI for [Bitwarden](#).

To use it, add `rbw` to the plugins array in your zshrc file:

```
plugins=(... rbw)
```

## **rbwpw**

The `rbwpw` function is a wrapper around `rbw`. It copies the password in the clipboard for the service you ask for and clears the clipboard 20s later. The usage is as follows:

```
rbwpw <service>
```

This plugin does not add any aliases.
