[Enum] ensure exceptions raised in `_missing__` are released

fix issue with enum member name matching the start of a private variable name

Fixed the return value of `TypeVar.__ror__`. Patch by Jelle Zijlstra.

Add `match_args` parameter to `@dataclass` decorator to allow suppression of `_match_args` generation.

OpenSSL 3.0.0: define `OPENSSL_API_COMPAT 1.1.1` to suppress deprecation warnings. Python requires OpenSSL 1.1.1 APIs.

Mocks can no longer be used as the specs for other Mocks. As a result, an already-mocked object cannot have an attribute mocked using `autospec=True` or be the subject of a `create_autospec(...)` call. This can uncover bugs in tests since these Mock-derived Mocks will always pass certain tests (e.g. `:func:`isinstance``) and builtin assert functions (e.g. `assert_called_once_with`) will unconditionally pass.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Misc\NEWS.d\ [cpython-main] [Misc] [NEWS.d] 3.10.0b1.rst, line 860); [backlink](#)

Unknown interpreted text role "func".

Add `:data:`ssl.OP_IGNORE_UNEXPECTED_EOF`` constants (OpenSSL 3.0.0)

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Misc\NEWS.d\ [cpython-main] [Misc] [NEWS.d] 3.10.0b1.rst, line 874); [backlink](#)

Unknown interpreted text role "const".

The documentation on the PyContextVar C-API was clarified.

Update dataclasses documentation to express that FrozenInstanceError is derived from AttributeError.

Fix the Sphinx glossary_search extension: create the _static/ sub-directory if it doesn't exist.

Update documentation to reflect that unparenthesized lambda expressions can no longer be the expression part in an `if` clause in comprehensions and generator expressions since Python 3.9.

Fixing the example code in Doc/extending/extending.rst to declare and initialize the `pmodule` variable to be of the right type.

Fix `test_logging.test_namer_rotator_inheritance()` on Windows: use `:func:os.replace` rather than `:func:os.rename`. Patch by Victor Stinner.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Misc\NEWS.d\ [cpython-main] [Misc] [NEWS.d] 3.10.0b1.rst, line 1438); [backlink](#)

Updated pegen regeneration script on Windows to find and use Python 3.8 or higher. Prior to this, pegen regeneration already required 3.8 or higher, but the script may have used lower versions of Python.

Actually updates Windows release to OpenSSL 1.1.1k. Earlier releases were mislabelled and actually included 1.1.1i again.

Update Tcl and Tk to 8.6.11 in Windows installer.

Upgrade Windows installer to use SQLite 3.35.5.

Fix WindowsConsoleIO errors in the presence of fd redirection. Patch by Segev Finer.

Fix check for macOS SDK paths when building Python. Narrow search to match contents of SDKs, namely only files in `/System/Library`, `/System/IOSSupport`, and `/usr` other than `/usr/local`. Previously, anything under `/System` was assumed to be in an SDK which causes problems with the new file system layout in 10.15+ where user file systems may appear to be mounted under `/System`. Paths in `/Library` were also incorrectly treated as SDK locations.

Drop support for `MACOSX_DEPLOYMENT_TARGET < 10.3`

Provide "python3.x-intel64" executable to allow reliably forcing macOS universal2 framework builds to run under Rosetta 2 Intel-64 emulation on Apple Silicon Macs. This can be useful for testing or when universal2 wheels are not yet available.

Build SQLite with `SQLITE_OMIT_AUTOINIT` on macOS. Patch by Erlend E. Aasland.

Update macOS installer to use SQLite 3.35.4.

Mac/BuildScript/build-installer.py will now use `"--enable-optimizations"` and `--with-lto` when building on macOS 10.15 or later.

Add mouse actions to the shell sidebar. Left click and optional drag selects one or more lines, as with the editor line number sidebar. Right click after selecting raises a context menu with 'copy with prompts'. This zips together prompts from the sidebar with lines from the selected text.

Fix reference leak in `test_sidebar` and `test_squeezer`. Patches by Terry Jan Reedy and Pablo Galindo

Indent IDLE Shell input with spaces instead of tabs

IDLE dialog windows are now recognized as dialogs by window managers on macOS and X Window.

IDLE's shell now shows prompts in a separate side-bar.

Add a new `:cdata:'Py_TPFLAGS_DISALLOW_INSTANTIATION'` type flag to disallow creating type instances. Patch by Victor Stinner.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Misc\NEWS.d\ [cpython-main] [Misc] [NEWS.d] 3.10.0b1.rst, line 1714); [backlink](#)

Unknown interpreted text role "c:data".

Remove the now unused `PYMALLOC_DEBUG` macro. Debug hooks on memory allocators are now installed by default if Python is built in debug mode (if `Py_DEBUG` macro is defined). Moreover, they can now be used on Python build in release mode (ex: using `PYTHONMALLOC=debug` environment variable).

`_PyInterpreterState_IDIncref()` now calls `_PyInterpreterState_IDInitref()` and always increments `id_refcount`. Previously, calling `_xxsubinterpreters.get_current()` could create an `id_refcount` inconsistency when a `_xxsubinterpreters.InterpreterID` object was deallocated. Patch by Victor Stinner.

Add new C-API functions to control the state of the garbage collector: `:c:func:'PyGC_Enable()'`, `:c:func:'PyGC_Disable()'`, `:c:func:'PyGC_IsEnabled()'`, corresponding to the functions in the `mod:'gc'` module.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Misc\NEWS.d\ [cpython-main] [Misc] [NEWS.d] 3.10.0b1.rst, line 1750); [backlink](#)
