

Next.js + Jest

This example shows how to configure Jest to work with Next.js.

This includes Next.js' built-in support for Global CSS, CSS Modules and TypeScript.

How to Use

Quickly get started using [Create Next App!](#)

In your terminal, run the following command:

```
npx create-next-app --example with-jest with-jest-app
# or
yarn create next-app --example with-jest with-jest-app
# or
pnpm create next-app -- --example with-jest with-jest-app
```

Run Jest Tests

```
npm test
```
