

## EventEmitter.on() method

Bind an event listener to fire when an event occurs.

**Signature:**

```
on(event: EventType, handler: Handler): EventEmitter;
```

### Parameters

Parameter	Type	Description
event	<a href="#">EventType</a>	the event type you'd like to listen to. Can be a string or symbol.
handler	<a href="#">Handler</a>	the function to be called when the event occurs.

**Returns:**

[EventEmitter](#)

`this` to enable you to chain method calls.
