

zh-CN

最简单的用法。

en-US

Basic usage.

```
import { Carousel } from 'antd';

function onChange(a, b, c) {
  console.log(a, b, c);
}

const contentStyle = {
  height: '160px',
  color: '#fff',
  lineHeight: '160px',
  textAlign: 'center',
  background: '#364d79',
};

export default () => (
  <Carousel afterChange={onChange}>
    <div>
      <h3 style={contentStyle}>1</h3>
    </div>
    <div>
      <h3 style={contentStyle}>2</h3>
    </div>
    <div>
      <h3 style={contentStyle}>3</h3>
    </div>
    <div>
      <h3 style={contentStyle}>4</h3>
    </div>
  </Carousel>
);
```
