

Home > puppeteer > Frame > addScriptTag

Frame.addScriptTag() method

Adds a `<script>` tag into the page with the desired url or content.

Signature:

```
addScriptTag(options: FrameAddScriptTagOptions): Promise<ElementHandle>;
```

Parameters

Parameter	Type	Description
options	FrameAddScriptTagOptions	configure the script to add to the page.

Returns:

Promise<ElementHandle>

a promise that resolves to the added tag when the script's `onload` event fires or when the script content was injected into the frame.
