

zh-CN

最简单的用法。

en-US

The basic example.

```
import { Popconfirm, message } from 'antd';

function confirm(e) {
  console.log(e);
  message.success('Click on Yes');
}

function cancel(e) {
  console.log(e);
  message.error('Click on No');
}

export default () => (
  <Popconfirm
    title="Are you sure to delete this task?"
    onConfirm={confirm}
    onCancel={cancel}
    okText="Yes"
    cancelText="No"
  >
    <a href="#">Delete</a>
  </Popconfirm>
);
```
