System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\library\ (cpython-main) (Doc) (library)html.rst, line 4)

Unknown directive type "module".

```
.. module:: html
   :synopsis: Helpers for manipulating HTML.
```

Source code: :source:`Lib/html/__init__.py`

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\library\ (cpython-main) (Doc) (library)html.rst, line 7); [backlink](#)

Unknown interpreted text role "source".

This module defines utilities to manipulate HTML.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\library\ (cpython-main) (Doc) (library)html.rst, line 13)

Unknown directive type "function".

```
.. function:: escape(s, quote=True)

Convert the characters ``&``, ``<`` and ``>`` in string *s* to HTML-safe
sequences. Use this if you need to display text that might contain such
characters in HTML. If the optional flag *quote* is true, the characters
(``"``) and (``'``) are also translated; this helps for inclusion in an HTML
attribute value delimited by quotes, as in ``<a href="...">``.

.. versionadded:: 3.2
```

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\library\ (cpython-main) (Doc) (library)html.rst, line 24)

Unknown directive type "function".

```
.. function:: unescape(s)

Convert all named and numeric character references (e.g. ``&gt;``,
``&#62;``, ``&#x3e;``) in the string *s* to the corresponding Unicode
characters. This function uses the rules defined by the HTML 5 standard
for both valid and invalid character references, and the :data:`list of
HTML 5 named character references <html.entities.html5>`.

.. versionadded:: 3.4
```

Submodules in the `html` package are:

- `:mod:`html.parser`` -- HTML/XHTML parser with lenient parsing mode

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\library\ (cpython-main) (Doc) (library)html.rst, line 38); [backlink](#)

Unknown interpreted text role "mod".

- `.mod:'html.entities'` -- HTML entity definitions

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\library\cpython-main) (Doc) (library) `html.rst`, line 39);
