

## deno\_ops

`proc_macro` for generating highly optimized V8 functions from Deno ops.

```
// Declare an op.  
#[op]  
pub fn op_add(_: &mut OpState, a: i32, b: i32) -> Result<i32, AnyError> {  
    Ok(a + b)  
}  
  
// Register with an extension.  
Extension::builder()  
    .ops(vec![op_add::decl()])  
    .build();
```
