

Rewrites Example

This example shows how to use [rewrites in Next.js](#) to map an incoming request path to a different destination path.

The index page ([pages/index.js](#)) has a list of links that match the rewrites defined in [next.config.js](#) . Run or deploy the app to see how it works!

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute [create-next-app](#) with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example rewrites rewrites-app
# or
yarn create next-app --example rewrites rewrites-app
# or
pnpm create next-app -- --example rewrites rewrites-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
