

In editors which use the Svelte Language Server you can document Components, functions and exports using specially formatted comments.

```
<script>
  /** What should we call the user? */
  export let name = 'world';
</script>

<!--
@Component
Here's some documentation for this component.
It will show up on hover.

- You can use markdown here.
- You can also use code blocks here.
- Usage:
  ```tsx
 <main name="Arethra">
 ...
-->
<main>
 <h1>
 Hello, {name}
 </h1>
</main>
```

Note: The `@component` is necessary in the HTML comment which describes your component.
