

## **jsoncpp**

Amalgamated from source commit 6aba23f, release 1.9.3.

Generating amalgamated source and header JsonCpp is provided with a script to generate a single header and a single source file to ease inclusion into an existing project. The amalgamated source can be generated at any time by running the following command from the top-directory (this requires Python 3.4+):

```
python amalgamate.py
```
