## Etd Rendezvous (Legacy)

### Warning

The `DynamicRendezvousHandler` class supersedes the `EtdRendezvousHandler` class, and is recommended for most users. `EtdRendezvousHandler` is in maintenance mode and will be deprecated in the future.

**System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\pytorch-master\docs\source\elastic\pytorch-master) (docs) (source) (elastic) rendezvous.rst, line 86)**

Unknown directive type "currentmodule".

Unknown directive type "autoclass".

```
.. autoclass:: EtcdRendezvousHandler
```

## Etcd Store

The `EtcdStore` is the `C10dStore` instance type returned by `next_rendezvous()` when `etcd` is used as the rendezvous backend.

**System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\pytorch-master\docs\source\elastic\pytorch-master) (docs) (source) (elastic) rendezvous.rst, line 96)**

Unknown directive type "currentmodule".

```
.. currentmodule:: torch.distributed.elastic.rendezvous.etcd_store
```

**System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\pytorch-master\docs\source\elastic\pytorch-master) (docs) (source) (elastic) rendezvous.rst, line 98)**

Unknown directive type "autoclass".

```
.. autoclass:: EtcdStore
   :members:
```

## Etcd Server

The `EtcdServer` is a convenience class that makes it easy for you to start and stop an `etcd` server on a subprocess. This is useful for testing or single-node (multi-worker) deployments where manually setting up an `etcd` server on the side is cumbersome.

### Warning

For production and multi-node deployments please consider properly deploying a highly available `etcd` server as this is the single point of failure for your distributed jobs.
