

Class: `TouchBarOtherItemsProxy`

Instantiates a special “other items proxy”, which nests `TouchBar` elements inherited from Chromium at the space indicated by the proxy. By default, this proxy is added to each `TouchBar` at the end of the input. For more information, see the AppKit docs on `NSTouchBarItemIdentifierOtherItemsProxy`

Note: Only one instance of this class can be added per `TouchBar`.

Process: Main *This class is not exported from the '`electron`' module. It is only available as a return value of other methods in the Electron API.*

`new TouchBarOtherItemsProxy()`
